Three lenses for PP issues

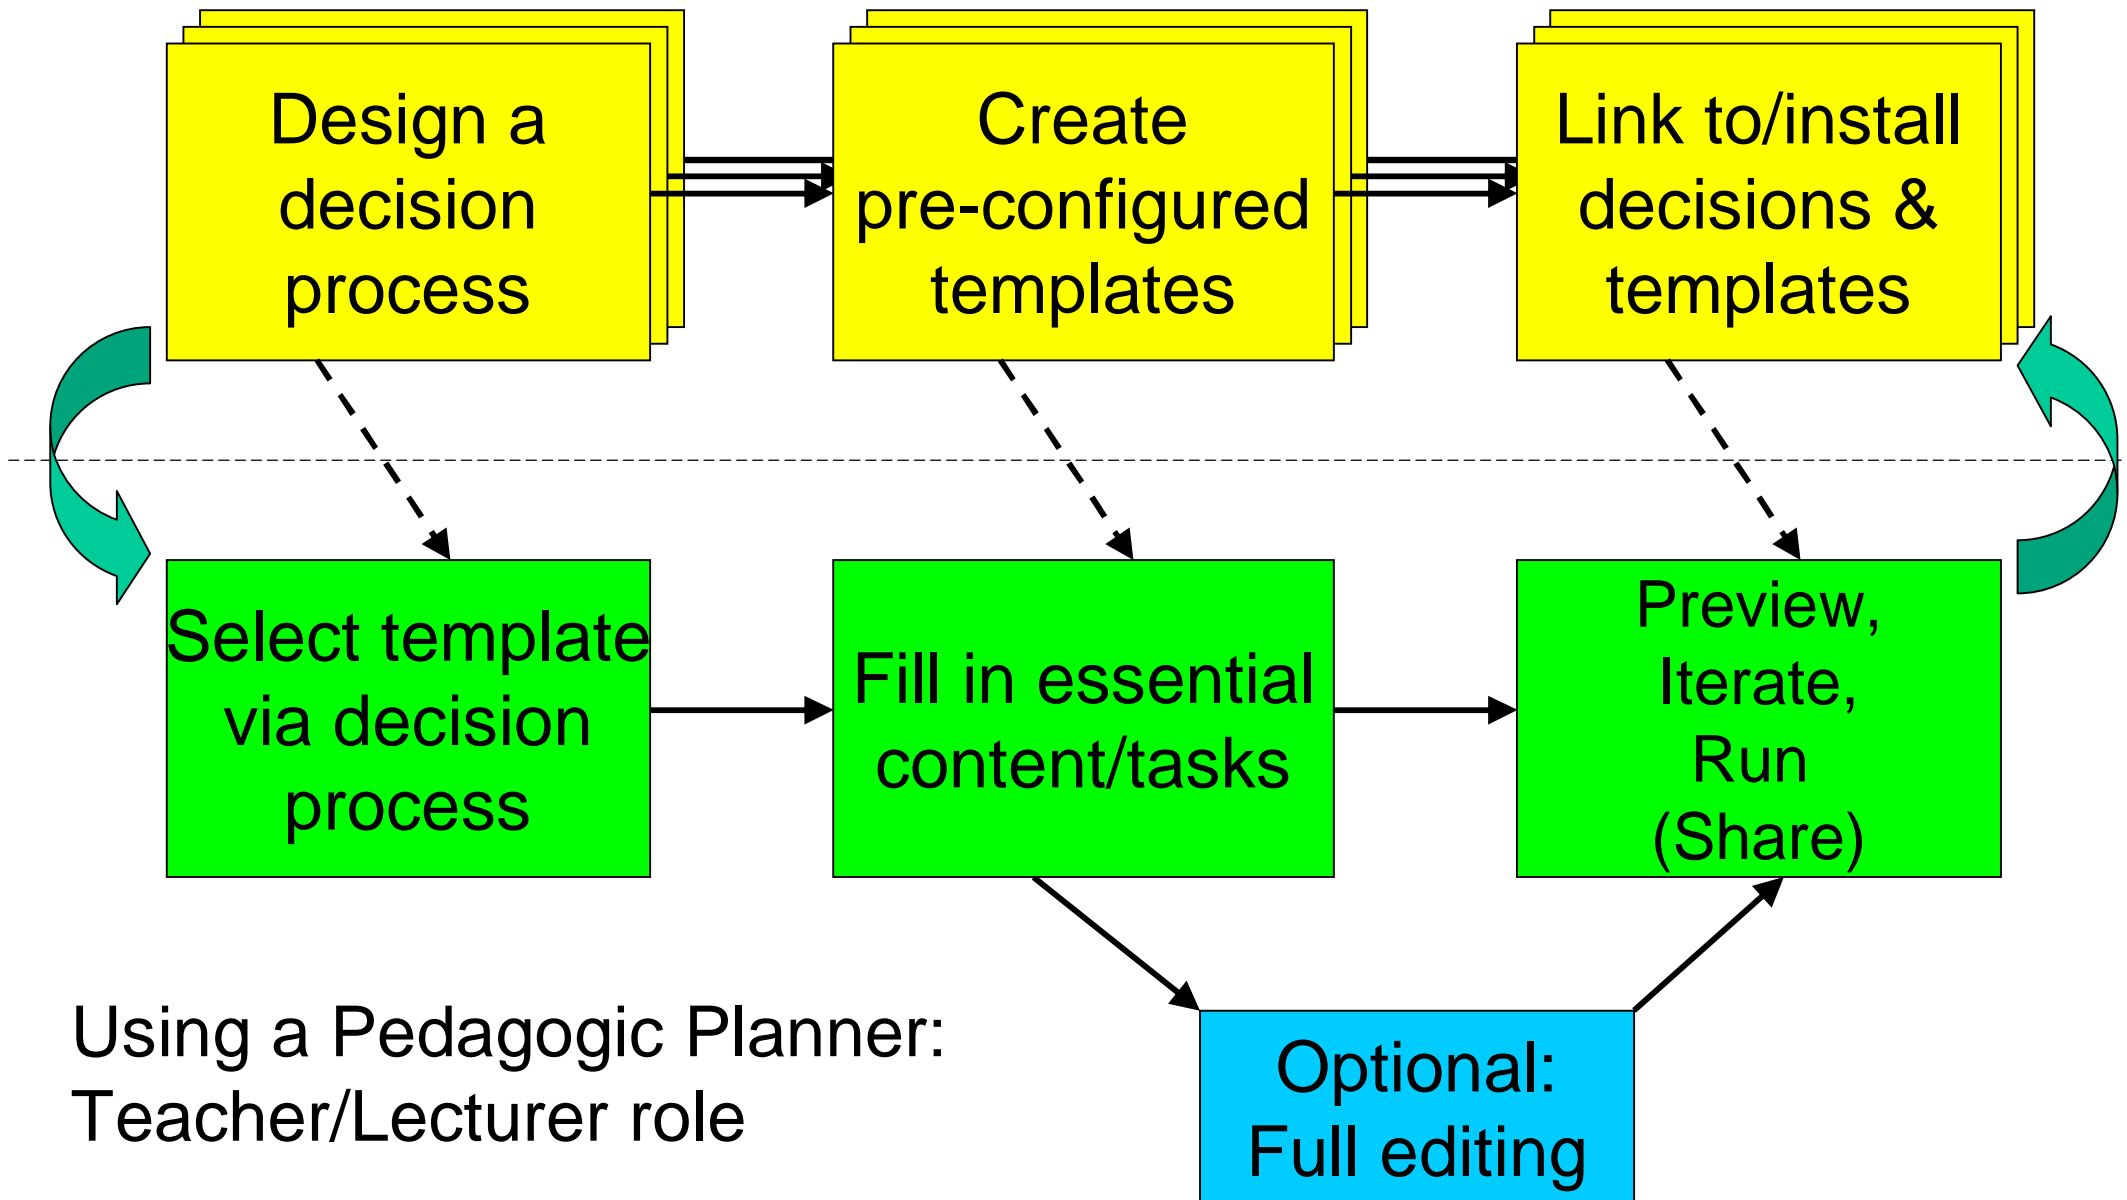

- Scale/Level of pedagogic ideas
 - Whole degree ; Whole course ; Module/Week/Class
- Amount of time expected of educator to be able to use
- Pre-built templates vs “Creative leap” required

(Stage 1)

(Stage 2)

(Stage 3)

Creating a Pedagogic Planner: Educational Designer role

Stage 1

- Stage 1 is for reflection on context, student needs, topic, constraints, etc
- Can be a guided process (eg, linear, cyclic); tagged repository; etc
 - Big or small
- My software interest is: having found something you might want to use, how to we make previewing, editing and running this easy?
 - (My pedagogic interest includes all the many ways that Stage 1 can be constructed, but this doesn't worry me as much in terms of overcoming a software development challenge – we just need a repository and/or a set of linked webpages)

The emphasis of the learning design is interacting and collaborating with peers to facilitate the discovery of differing perspectives...

[Exploring Alternative Perspectives](#) - ([Why would I use this?](#))

Provides students with an balanced view of a controversial topic

[Problem-based Learning](#) - ([Why would I use this?](#))

Problem-based learning builds a lesson around a central question that requires the students to either solve a problem or make a decision.

[Project/Case Study Focus](#) - ([Why would I use this?](#))

The emphasis of the learning design is to create a product or artifact.

[Role Play Focus](#) - ([Why would I use this?](#))

The emphasis of the learning design is subrogation: "walking in the shoes of others"

Introduction to the activity

Add text here outlining the activity

Students give their opinion on the activity. Add an open-ended question here:

Provide students with up to 4 websites providing alternate and opposing points of view:

URL File IMS CP package

[Help?](#) [Need Help?](#)

Close

Select an open-ended question on the topic of your choice for general discussion. Ensure it is broad enough to encourage wide-ranging discussion and is not biased in any way.

Eg. "Is delivering your entire course online an educationally sound thing to do?"

Build around one LD run-time?

- So, if we can support many different types of “Stage 1” areas, can we standardise on using one LD run-time system?
 - And hence unify efforts on expanding run-time to meet new Stage 1 features needed?
 - If so, we can offer LAMS as the run-time if others want to work with us on a unified run-time strategy (and a diversity of planning/design environments, ie, stage 1s)
